Your patients want a better option for pain relief.

Introducing Quell®, 100% drug free technology for widespread relief from chronic pain.

- FDA cleared for day and night use
- Patented OptiTherapy® technology automatically adjusts therapy dose to deliver optimal relief
- Wearable, lightweight and rechargeable
- Control the device and track therapy and sleep with an optional smartphone app

Clinically Proven Technology.

81% reported improvement in chronic pain (PGIC)³

67% reported decrease in pain medication use³

Wearable Intensive Nerve Stimulation (WINS) technology works to block pain in the body

1 Sensory nerves carry neural pulses to the brain.

2 Neural pulses trigger the release of the body’s endogenous opioids that block chronic pain signals at the delta opioid receptor.

3 Worn on the upper calf, Quell stimulates sensory nerves.

References:
Patented OptiTherapy® technology. Customized for your patients.

- Customization through a simple calibration process the first time patients use the device
- Optimal dosage for each patient calculated via a patented algorithm
- Therapy intensity programmed to adapt to sleep condition
- Nerve habituation overcome by automatic intensity increase throughout therapy
- Stable nerve stimulation delivered through current-regulated pulses, even when skin/electrode interface changes
- Maximum stimulation efficiency achieved with biphasic and symmetrical stimulation pulse waveform

Smartphone app gives patients control*

- Start, stop and adjust therapy discreetly from a smartphone
- Review therapy and sleep trends over time in 1 day to 3 month increments
- Monitor eight important dimensions of sleep such as body movement and position during the night and learn more about Quell therapy sessions
- Provide patients and their healthcare professionals with more insight into their chronic pain management

*App is not required to use Quell device

Quell patient testimonials:

**Mickey**
Maryland, Pain Management Nurse
As a nationally known pain management nurse and advocate for people who live with pain, I am excited to see that there is a new, wearable and non-medication based pain relief option on the market. My osteoarthritis pain used to have me limping by the end of most days, often needing to take pain medication and at times interfering with my quality of sleep. With Quell, pain no longer gets in my way.

**Jesse**
New York, Museum Security Supervisor
As a museum security supervisor and NYPD auxiliary member, I’m on my feet all day. I used to have to switch between five pairs of shoes a day just to try and find relief. Now that I’m using Quell, my pain is greatly reduced and I’m also sleeping much better throughout the night.

Quell helped me reduce the amount of medication I was taking and feel better about maintaining an active lifestyle.

For a product demonstration please call your local representative, or for additional information please contact Quell at 1-800-204-6577 or CustomerCare@quellrelief.com.
